

## P920

### LG Optimus 3D P920

The LG Optimus 3D is the world's first full 3D smartphone promising to change the way you interact with your phone. This high-performance smartphone lets you record, view and share 3D content without glasses. The 4.3" WVGA display provides bright images allowing users to view 2D (up to 1080p) and 3D (up to 720p) multimedia content. You can share content on YouTube's dedicated 3D channel directly from your smartphone or share via an HDMI 1.4 connection to your TV or DLNA Certified products.

**Coming soon**
